

CAÑUELO WALK

This is a pleasant walk that connects the two ends of the village around the Castle. It is named after the spout, the water comes out in this area and is collected in the Fuente del Cañuelo (Reinando Carlos III year of 1.788) which is located in the middle of the route in the lower part of the walk. During the walk we find several benches to rest and a small area where we can see the depth of the landscape and immortalize the moment with a photo.
