

## Traditional Art And Taste Route

The wealth and variety of its cuisine has produced the creation of a tourist route known as “Art and Taste”. Their wines with certificated of origin Montilla-Moriles has the fame and prestige just as the extra virgin olive oils. Lucena is the cradle of renowned craftsmen with a family tradition of many generations; with their hands they know how to turn materials into art. Lucena’s potteries are very recognized where unique pieces are made, of Arab tradition, with decoration and characteristic enamels being so important, that at one time they were grouped in the Llano de Tinajerías. Of equal prestige are the goldsmith and bronze workshops, with the "Velón de Lucena" as the most characteristic piece and symbol of the city, and equally exquisite works related, mostly, with Sacred Art, which adorn the thrones of the steps of Holy Week throughout Spain.
